Commercial Door Control*

# AR3 Indicator Strip

## Instantly Simplifies and Clarifies Complex Signaling

Managing multi-step door sequences, interlocks, and safety conditions doesn't have to be complicated.

The AR3 Indicator Strip turns complex system logic into clear, easy-to-understand visual signals. Bright, dynamic LED patterns show exactly what the door is doing – reducing confusion, improving response time, and keeping operations running smoothly.

From door state sequencing to dock operations and vehicle positioning, AR3 Indicator Strips make even the most complex signaling simple and intuitive.

## SPECIFICATIONS

- 1-meter strip with 30 high-visibility LEDs (multiple color options)
- Wide 190° viewing angle
- 1 ft lead with IP-rated circular connector
- 10m cable with mating connector available
- Rugged aluminum mounting channel
- Integrated diffusing lens

## MAKES DOOR ACTIVITY OBVIOUS

Turns multi-step door actions into simple color and motion cues so operators instantly understand what's happening.

## REPLACES MULTIPLE SIGNAL DEVICES

One streamlined solution communicates more with less hardware.

## NO PROGRAMMING REQUIRED

Simply select from predefined colors, patterns, and behaviors to match your sequence logic and safety requirements.

## RUGGED & RELIABLE

IP65-rated and built for industrial environments. Features a sealed LED array, diffusing lens, and durable aluminum channel for a secure, professional installation.

## SCALABLE & SYSTEM-READY

Connect up to four strips to integrate with the AR3 Platform. Powered by 24VDC with expansion options for larger setups.

## IDEAL APPLICATIONS

- Door state indication and sequencing
- Airlock and interlocked door systems
- Loading dock status and sequencing
- Truck approach and positioning guidance
- Equipment status and process indication
